ORBZ™ XL™

Out-of this world shapes and designs! Anagram's Orbz™ are intended to be over-inflated to create a spherical, beach ball shape. Each Orbz™ balloon is packaged with an inflation instruction for ease of use! What's more? Orbz™ are now Orbz™XL® - meaning they last longer!

ULTRASHAPES™

We've done the math, studied our geometry, and we know we have the next big thing with Anagram's geometric UltraShapes™ - a New Angle on Balloons! Inflation is the only thing basic about these unique shapes of brilliantly colored Cubez™ and Diamondz™.

Gas Cylinder Info

BALLOON INFLATION MADE EASY

1

Remove the foil balloon from its packaging, and fully unfold.

2

Insert the nozzle from the balloon regulator into the small hole located in the neck of the balloon. Ensure the entire balloon is supported in an upright position to ensure the helium gas can flow freely. Push regulator nozzle in to inflate.

3

Inflation will automatically stop when the balloon is full. Remove the valve nozzle from the balloon, no gas will escape as the balloon valve seals automatically. Finally, tie an Anagram balloon weight to the end of the ribbon.

CYLINDER/REGULATOR TIPS

1

Always ensure the cylinder is in an upright position with the gas turned OFF.

2

Push the regulator onto the outlet until it clicks!

3

Open the cylinder inlet valve. It is now ready to use.
